

Crop Protection Data Entry Workflow Best Practices

Step by Step Instructions

1. Navigate to **Crop Protection > Assign CP Applications**.

2. [Create](#) Crop Protection applications.

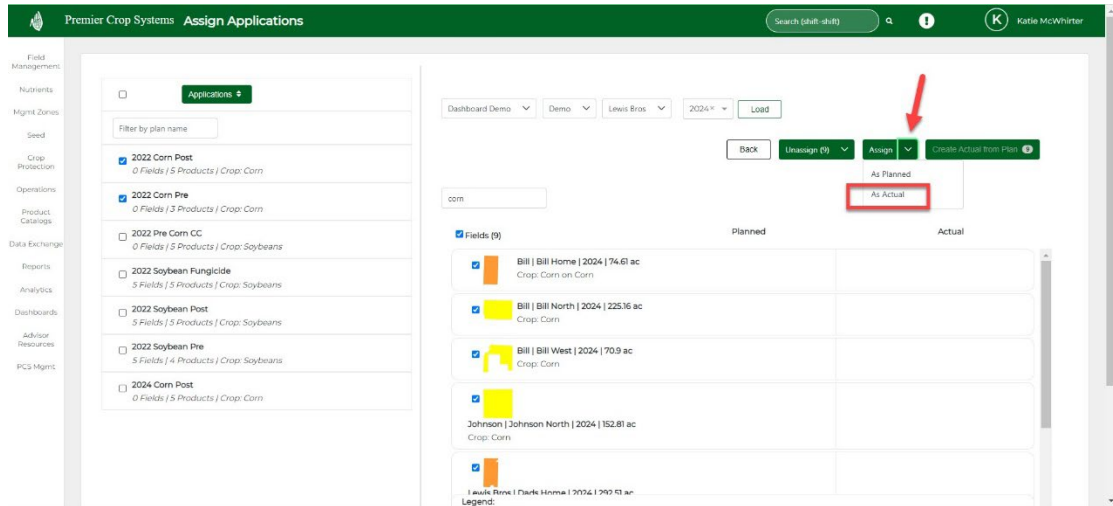

If you enter in a Custom product while creating your Crop Protection Applications, email data.support@premiercrop a copy of the tech sheet and inform them of the Grower you entered in the product for to speed up the approval process!

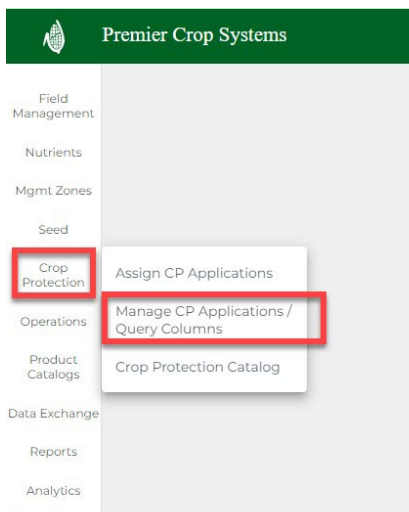

PREMIER PROCESS

3. [Assign the Crop Protection Applications](#) to the desired fields.

4. Navigate to the **Crop Protection > Manage CP Applications/Query Columns** page.

PREMIER PROCESS

- You can account for any exceptions by editing at a field level. (Ex: A post application for all corn fields was the same **EXCEPT FOR** three of the fields got a higher rate of Roundup PowerMax 3.)

- You will need to [assign a Query Rate Column](#) for any Fungicide, Insecticide and/or Foliar product(s) that your Grower applied.

PREMIER PROCESS

7. You will also need to [enter in costs](#) for the products.
